Entropy (information Theory) - Wikipedia

Information Entropy Is The Average Rate At Which Information Is Produced By A Stochastic Source Of Data.. The Measure Of Information Entropy Associated With Each Possible Data Value Is The Negative Logarithm Of The Probability Mass Function For The Value. Thus, When The Data Source Has A Lower-probability Value (i.e., When A Low-probability Event Occurs), The Event Carries More "information ... May 19th, 2018

Information Theory - Wikipedia

The Landmark Event That Established The Discipline Of Information Theory And Brought It To Immediate Worldwide Attention Was The Publication Of Claude E. Shannon's Classic Paper "A Mathematical Theory Of Communication" In The Bell System Technical Journal In July And October 1948.. Entropy (Information Theory) | Brilliant Math & Science Wiki

In Information Theory, The Major Goal Is For One Person (a Transmitter) To Convey Some Message (over A Channel) To Another Person (the Receiver). To Do So, The Transmitter Sends A Series (possibly Just One) Partial Messages That Give Clues Towards The Original Message. The Information Content Of One Of These Partial Messages Is A Measure Of How Much Uncertainty This Resolves For The Receiver. Apr 2th, 2018
